

Quality Management System

Sustainability & Environmental Commitment

Reference No: QMS-POL-002 | Revision: 0 | Effective Date: May 7, 2026

United Ship Service (USS Inc) is committed to conducting its operations in a responsible, ethical, and sustainable manner. As a provider of marine, shipyard, and industrial services, USS Inc recognizes the importance of minimizing environmental impact, maintaining safe operations, and supporting sustainable practices across our projects and partnerships.

1. Environmental Responsibility

USS Inc operates in compliance with all applicable environmental laws, regulations, and customer-specific requirements. We actively promote responsible practices through:

- Proper handling and disposal of materials and waste
- Prevention of pollution and environmental incidents
- Coordination with customers and shipyard partners to meet site-specific environmental standards

2. Sustainable Operations

Our operational model is designed to reduce inefficiencies and environmental impact by:

- Utilizing a controlled network of qualified subcontractors and affiliated partners
- Planning and coordinating services efficiently to minimize unnecessary travel, material use, and delays
- Continuously reviewing operational performance to identify opportunities for improvement

3. Supplier & Subcontractor Responsibility

USS Inc works with subcontractors and affiliated entities under controlled conditions and expects all partners to:

- Comply with applicable environmental, health, and safety regulations
- Operate in a manner consistent with responsible and ethical business practices
- Support customer and regulatory sustainability expectations where applicable

Quality Management System

4. Compliance & Governance

Sustainability is integrated within USS Inc's Quality Management System, aligned with ISO 9001 principles, including:

- Regulatory compliance across all operations
- Controlled management of externally provided services
- Risk-based thinking and accountability for service delivery

5. Continuous Improvement

USS Inc is committed to ongoing improvement of its environmental and operational performance through:

- Periodic review of processes and project execution
- Identification and management of risks and opportunities
- Alignment with evolving customer, industry, and regulatory expectations

USS Inc remains committed to responsible operations, environmental stewardship, and continuous improvement as part of delivering reliable, high-quality services to our customers worldwide.
